

YOUR CONNECTION

should be pure and simple.

That's why WBS Connect provides the largest selection of IP transit contracts, unbiased guidance, and direct connections in the US, Europe and Asia. As an independent voice among IP carriers, we'll keep you up-to-speed on the latest happenings in the IP transit and telecommunications industry.

Launching in 2003 and growing through acquisitions and mergers, WBS Connect quickly became one of the largest data wholesalers in North America, facilitating complex wide area networking projects for wholesale customers and securing dedicated trunk facilities worldwide. Our growth continues through a strong channel-driven approach, unparalleled customer service and unique ability to be our customers' single point of contact.

IP TRANSIT

We build intelligent network strategies, boasting 100Gb of traffic on the Internet today and offering 13 carriers with multiple 10Gb ports on both IPv4 and IPv6.

CONSULTING

We offer complex Local Area Networks (LANs) and Wide Area Networks (WANs) engineering, High Availability Solutions, BGP Configuration, Autonomous System (AS) and more.

Our Cisco-certified engineers assist in the architecture and design of wide-area complex solutions.

TRANSPORT

Understanding complexities of point-to-point and point-to-multipoint transport, we have the relationships, backbone, infrastructure, and private lines to securely connect wholesale customers' complex wide area networking projects worldwide - from North America, Europe, the Middle East, Asia, and beyond.

COLOCATION

We broker large wholesale footprints of datacenter space across North America, Europe and Asia - from individual cabinet space to as large 10,000 sq ft.

We continue to work with some of the largest real estate investment trusts (REIT) and other large operators of datacenters worldwide.

IMAGINE

a single authoritative voice

We've expanded and turned up hundreds of connections on our carriers, ultimately streamlining and eliminating carriers' provisioning hassles and allowing you a single point of contact for SLA credits, billing and more.

LISTEN

our customers speak for us

Our customer base includes some of the largest and most respected names on the Web today - evolving from from niche content providers to large data centers, ISPs, Competitive Local Exchange Carriers (CLEC), regional and international carriers, US Government, state universities and other emerging users of large-scale data.

BELIEVE

proven return on investment

Your organization will not only see increased bandwidth performance and reliability with simplified access to multiple IP transit carriers, but also full-service support and lower overall connectivity costs.

COMMUNICATION

simplified

Shrink connectivity costs and **stress less**
with an intelligent network strategy and a synchronized team from **WBS Connect**.

THE CONNECTION

is clear

The link between the Internet, the customer experience, and revenue production has never been more clear. Our global network means enterprises and content providers get uninterrupted, reliable last-mile access to ensure end customers are satisfied and spending.

Let us customize a transit, transport, colocation, and expert data networking package to fit your precise business needs. Just because the networking world is complex, doesn't mean it has to be a headache for you.

As your IP connectivity advocate and wholesale bandwidth broker we purchase and manage multi-gigabit commitments with premier carriers, manage the contracts, and provide you with full-cycle support, including simplified billing.

And with a full-time staff of administrators and network engineers your team can stay lean. You'll also be confident you have the flexibility and scalability your high-powered businesses demands.

“ The bottom line is that WBS Connect allows us to be more competitive in our market, saving us about 30 percent in IP connectivity costs. They cover every aspect of our connection needs including multiple carrier options, cost savings, performance and simplified billing.
~ **Ryan Duda, Network Engineer for 123.net** ”
