### What's at risk?

#### Your Personal Information

According to a 2006 industry report, spyware programs designed to track your behavior and gather your personal information are growing at a rate of 254%! This presents a bigger threat than viruses, which are actually at a rate of 32%.

#### Your PC

Infected computers can be more likely to crash. Use our free scan to find out if your computer is at risk.

#### Your Finances

Identity theft is expensive. Today's sophisticated spyware can steal bank account and credit card numbers. Don't be left paying the bill.

#### Your Online Experience

Popular online activities like downloading music and other files present the perfect opportunity for spies to strike. Protect yourself with Spy Sweeper—the best spyware protection of its kind.

### Why Spy Sweeper?

#### It's Proven

Spy Sweeper detects, removes and blocks 97% of all spies—40% more than any other antispymware solution.

#### The Expert's First Choice

Spy Sweeper is an eight-time winner of PC Magazine's "Editors' Choice" award. In fact, no other antispymware product has won more awards.
